Think of having seedless watermelons, transparent jute pulp with no seeds to hinder your enjoyment. Think of having a muskmelon sweet and ledous to its center. Is not this worth trying for, worth a little experimenting. Try it.—When the vines have grown some three or four feet, cover the stalk at third or fourth leaf, and keep it covered until it akes root, which will take from two to three weeks. After it has taken root, the vine must be severed from the parent stalk. The new plant will produce seed less melons. Try it and see what can be done.

The beautiful steamer Queen City.

As she leaves on her first trip.

She's as graceful as she's handseme As she elides along the stream.

She's as graceful as she's hands: As she glides along the stream She's the finest on the Ohio That was ever heard of or seer

She's the grand majestic steam On the "Hudson of the West; She far outshines the others, And is known to be the best.

Her fine, palatic abin,
What a grand and pleasant eight!
With her courteous and manly officers
Entertaining their guests each night.
Ble's as staunch as an old warrior,
And the pretitest thing that floats,
She's the swiftest and the only one
And the "Queen" of all the boats.
